Dear Parents and Carers,

We are thrilled to announce an exciting opportunity for our children to engage with the thrilling world of STEM through a special physics competition! Your child is invited to design a rocket on a poster, capable of safely landing on the fascinating surface of Mars. This is not only a chance for them to explore the principles of physics but also to unleash their creativity and innovation.

We encourage children to include detailed sketches and descriptions of their rocket designs, highlighting the scientific concepts they have considered. If your child wishes to create a model rocket, they are allowed to do this! However, this is optional as a poster entry is more than sufficient!

All designs and any accompanying models should be submitted to Miss Balderson by Monday, 19th May 2025. Please ensure your child writes their full name and class teacher's name on their design.

The excitement doesn't end there! The winning designs will be rewarded with a fantastic 'STEM Rollercoaster Kit'. We hope this competition sparks curiosity and passion for the wonders of science in your child.

Happy designing!

Kind regards,

Miss Balderson
